

MODEL 90XP

9" Capacity Hand-Fed Chipper

The Bandit® Model 90XP has a distinguished career of well over 20 years, serving tree care professionals, rental companies and municipalities needing a **productive, cost-effective, and durable chipper**. Whether working brush clearing, utility clearing, or rental duties, this fleet-favorite features a wide throat opening and Bandit's **proven Slide Box Feed System**. It's extremely productive and efficient in processing large amounts of brush at once, as well as big limbs and small trees.

COMPACT AND POWERFUL

The Model 90XP is easy to tow and maneuver, so even light trucks can easily pull this chipper to jobs. But when it's on the job, the Model 90XP really shines! It's able to easily chip a steady diet of trees, brush and pruning up to 9 inches in diameter.

MAXIMIZE YOUR UPTIME

The most common maintenance items are easy to access on Bandit chippers, so daily maintenance is quick and simple. Bolt-in knives are easy to change through the chipper hood, and all service areas are conveniently located, including all grease points. And a sloped indeed tray allows material to flow smoothly into the chipper.

POWERFUL FEED SYSTEM

The powerful feed wheel system crushes and compresses limby materials. A 24 cubic-inch displacement hydraulic motor has the power to pull long material into the chipper, reducing the cost of converting trees and brush into chips by reducing the amount of sawing.

THE PERFECT GEOMETRY

The Model 90XP uses a chipping disc placed at a 45-degree angle to the infeed opening, making it much more effective at chipping small diameter brush and viney material than other chippers in this class.
